Project #12- seeing design

We are all consuming lots of movies and TV shows right now.

Select a movie or television show you enjoyed.

Analyze at least two design elements - use images from the show for reference.

Using design terms, discuss what the design accomplishes - (or tries to) and how successful you think the design was. Does it fit with the show?

Is the design more than spectacle? Or, is it visual language that is supportive of the characters and themes?

How?

Discuss what design tools you think are used. Find out who created the work that grabbed your attention.

Be prepared to tell us who the designers are and some of their other work. These people have influenced you, you should know more about who they are and what they have done. Many of them are featured in videos about their work.
