

THTR353

SCENE DESIGN

FINAL PROJECT

The final Project in this class is of 25% of your grade. It consists of the following:

1). In class presentation of the play you plan to design. This presentation will consist of a general outline of the plays action, scenic requirements, why you chose this play and what you think this play is about. This presentation will be Monday, April 20.

2). The final presentation. Monday, May 4, 10:30 am. For this final presentation, you will have to have the following:

- At least one rough "idea" sketch (thumbnails are good)
- A drafted 1/4"= 1'-0" floor plan
- Drafted elevations and/or platform plans
- A perspective sketch in at least pencil, with light and shadow OR
- A model with all furniture made and details sketched on AND
- A presentation to the class which will include your approach to the design, problems you solved etc. I hope for a lively and supportive class discussion of each design.

All materials due no later than Monday, May 4, 12:30 pm

You should plan your time so that you are able to do your best work. I'd expect rough sketches by the 22nd, floor plan by the 24th and elevations by the 29th. This gives you some time to work on either a sketch or model.

Take these step by step, stay on schedule and you can all do this.
